WORK EXPERIENCE

Cordova Educational Solutions - *Frontend Developer*

Apr 2023 - Present

- Collaborated with backend teams to integrate RESTful APIs, automating event scheduling workflows and reducing manual errors by 20%, boosting operational efficiency.

Luminar Technolab - *MERN Stack Developer*

Sep 2022 - Mar 2023

- Built 6+ full-stack applications with React, Node.js, and MongoDB, improving code reusability by 25% through standardized UI components and a shared design system.

KEY PROJECTS

Fleet & Event Management System - *React, Redux, Node.js, RTK Query*

- Optimized RTK Query caching to reduce data load times by 30% for 1,000+ vehicles/drivers, enabling real-time tracking of 50+ concurrent events.

Live Vehicle Tracker - *React.js, Wialon API, React Google Maps*

- Improved route accuracy by 15% using Wialon API for real-time GPS updates on 50+ routes.

Netflix Clone - *React, TMDB API, Material UI*

- Developed a feature-rich clone with dynamic UI and integration of TMDB API.

RooMate - *React, Node.js, Socket.IO*

- Built real-time chat app using Socket.IO, handling 500+ concurrent users.

Paymate - *Angular, Node.js, MongoDB*

- Engineered banking app with JWT authentication and 98% test coverage via unit testing.
